OVERVIEW

B.Tech CSE student with experience in developing dynamic and user-friendly websites. Completed projects showcasing design skills and commitment to high-performing applications. Possess strong problem-solving abilities and a continuous drive to learn and adapt to new technologies. Seeking an entry-level position in web or software development to apply my skills and grow in a collaborative environment.

EDUCATION

SAGE UNIVERSITY BHOPAL

November 2021-Present

B.Tech CSE

EXPERIENCE

Webstrot Technologies

1st July-Present

Web Development Intern

- Created modern and responsive portfolio templates from Figma designs, ensuring a user-friendly interface and high visual appeal.
- Worked closely with the design and development teams onsite, benefiting from the guidance of senior developers.
- Gained hands-on experience with industry-standard tools such as jQuery and Bootstrap.

PROJECTS

Learn With Unnati- EdTech Platform

May-2024

- Designed and developed a high-conversion landing page for the edtech platform "Learn with Unnati" using Gamma AI.
- Created a visually appealing and user-friendly layout that effectively communicates the platform's value proposition and key features.
- Incorporated a Google Form link on the landing page to facilitate easy and efficient registration for classes, streamlining the sign-up process for users.

SEMNOTES - College Notes Desktop App

Sept 2022- May 2023

- Collaborated in a **team of three** to develop a desktop application that gives college students a platform to get systematic notes.
- A solution to notes sharing problem and notes offering the system for every year student irrespective of their specialization in one place.
- Developed features for efficient note categorization by subject, semester, and topic, enhancing the accessibility and usability of study materials.
- Tech Stack:** Java, Java Swing, IntelliJ IDE
